

WOOD LINE

Making your House feel more like a **HOME**
*Aus Dem Haus Ein **HEIM** Machen!*

A COMPANY MADE UP OF PEOPLE.... BELIEVING IN THEIR WORK!

LINCAR realize for over half a century, domestic heating products of high technology, reliability and high quality combined with a best service of partnership & cooperation. The company situated in Reggio (RE), in these last years confirmed his presence in the national, European and International market with a particular attention to development of product, research and improvement.

We produce more than 70 models of **burning wood & pellet stoves and cookers**, with different design from traditional one to the high-tech passing through several technical solutions as the ducting system stoves or the pellet boiler models.

Simple lines, innovative materials and careful decoration for the pleasure to create an exclusive, intimate and warm atmosphere.

Our competitive effort has focused on the **technological ability and innovation** of the product, to give you solutions reliable, thanks to a competent and highly professionalism.

Quality of service, timely deliveries and a capable programming are our strengths.

The care, fantasy and the typical Italian style are combined with the saving and eco-friendly philosophy; in this way born high quality products, built completely in Italy and appreciated all over the world for their performances and beauty.

The excellence of Made in Italy, is reflected in particular in each series of Lincar products: formal rigor, attention to detail, imagination and reduced environmental impact, they become inseparable priorities and prerogatives.

CERTIFICATION OF QUALITY

The vocation to development, service, innovation allows to Lincar to grow and develop itself achieving safety, quality, reliability and elegance of their products. For over forty years we spent our energy and our competence to realize high quality heating stoves; using best technical devices to obtain the higher level of safety performance combined with the Italian style design, fully respecting the environment. Every heating equipment is submitted to strict performance tests to obtain a certificate of approval only if it reaches the values required by normative in force. **All Lincar's products are marked "CE" as required by European CEE 90/396**, in addition Lincar obtained in 1988 the certification ISO 9001:2008. All this guarantees to final customer high quality of bought product.

WOOD BURNING STOVES

AND WOOD BURNING COOKERS WITH BOILER

THE WARMTH OF YOUR HOME

In the tradition, Lincar is always leader in the production of wood burning cookers, the high quality of products and a complete range among economic wood burning cookers, the modern ones and the model with ceramic. It's an ever growing fusion between tradition, furnishing and cooking.

DIE WÄRME VON ZU HAUSE AUS

In der tradition, bestätigt sich Lincar Leader in der Herstellung von Festbrennstoffherde, aus hoher Qualität, sowie mit einer umfangreichen Palette von Modellen, die sich an jeden Küchenstil anpassen. Immer größer ist der Treffpunkt zwischen Tradition, Einrichtung und Kochen.
